

Info Event - April 24: Turquoise Hydrogen for Industry.

Invitation: Low-Carbon Hydrogen – Affordable and Industry-Ready by 2026!

Forward-thinking companies are turning to methane pyrolysis/plasmaplysis – especially in light of the adoption of the EU Low Carbon Hydrogen Delegated Act – to:

- ✓ Low-carbon hydrogen (2–3 €/kg)
- ✓ High-purity carbon as a valuable byproduct
- ✓ Efficient use of high-temperature waste heat up to 750°C
- ✓ Reduction of their overall CO₂ emissions and climate impact

Unanswered questions? We've got you covered:

- Regulation & certifications
- Economics & scalability

- Funding programs & carbon credits, EU ETS, Regulation on the certification of carbon removals
- Tech status: What's possible today?

When & Where:

📍 **Hannover Messe | 24.04. | 2 PM | Hall 19, Conference Area**

Who's joining:

Five German industrial gas users – from steel, cement, coatings, and energy – bringing real demands and application insights.

Goal: Clear insights, practical solutions, strong networking.
Secure your spot: Register now at email info@graforce.de
